Experience

Globant

Senior Software Engineer - Team Lead
Feb 2022 - Present

- Led a frontend team, effectively addressing and resolving technical requests.
- Designed innovative features, enhancing both client satisfaction and product usability.
- Managed two distinct customer applications using Angular 2+ and React, utilizing GitLab for version control.
- Optimized applications, updated dependencies, and upgraded versions.
- Established training routes for junior engineers.

EPAM Systems

Senior Software Engineer
Aug 2021 - Feb 2022

- Proposed innovative approaches, architectures, and dependencies for client applications.
- Developed websites and user interfaces for cruises, restaurants, and hotels using standard HTML/SCSS, aligning with stakeholder requirements.
- Optimized legacy code, ensuring adherence to best coding practices with a focus on performance.
- Migrated from jQuery to Vanilla JavaScript and React.js.

Tata Consultancy Services

Software Engineer
Aug 2019 - Aug 2021

- Designed a frontend application utilizing Angular 2+.
- Collaborated with the planning and development team to review application features and strategize future enhancements.
- Offered expert technical support for the development, installation, and maintenance of business applications.
- Ensured seamless integration of new features with existing systems for enhanced user experience.

Freelance Web Developer

Web Developer
2017 - Present

- Delivered tailored web solutions, crafting sites and apps using Angular and Node in short-term projects.
- Crafted intuitive site navigation, embedded social media integrations, and organized content cohesively.
- Ensured robust site functionality by rigorously testing Angular, Node, CSS3, and HTML5 across platforms.
- Refurbished and augmented existing sites, making pertinent content alterations on contract-based projects.

Education
